Software Engineer

PROFESSIONAL SUMMARY

Experienced backend engineer adept at developing scalable Python-based backend services and web APIs using Flask and FastAPI, with strong proficiency in AWS cloud environments, PostgreSQL, and Docker, foundational to modern microservices architectures.

WORK EXPERIENCE

Acme Corp — Backend Engineer (2021-Present)

- Engineered and deployed scalable web APIs using Python and Flask, forming core backend services.
- Administered and optimized PostgreSQL databases to ensure data integrity and performance.
- Contributed to and supported AWS cloud deployments, ensuring robust infrastructure.

PROJECTS

- Developed internal automation tooling using Python, enhancing operational efficiency.
- Engineered data ingestion pipelines, leveraging Python for robust data processing.

EDUCATION

BS Computer Science, State University

TECHNICAL SKILLS

- Python - AWS - PostgreSQL - Docker - FastAPI - Flask
