EXPERIENCE

Associate Software Engineer

05/2026 – Present

Nextgen Imprexis Devtech Solutions Pvt Ltd

- Training in Java Application Development focusing on OOP, Collections Framework, Exception Handling, and SQL.
- Learning enterprise software development practices, application architecture, and client-driven development workflows.
- Participating in domain and project onboarding sessions for business process automation and enterprise application development.

Intern – Machine Learning

01/2025 – 04/2025

Ineuron Intelligence Pvt Ltd

- Built a retail sales forecasting model using Random Forest, improving prediction accuracy and reducing RMSE by 18%.
- Designed an ML pipeline including preprocessing, feature engineering, and model training.
- Deployed a Streamlit inference application on AWS EC2 with structured logging.

EDUCATION

B.E in Information Science and Engineering

08/2019 – 07/2023

CMR Institute of Technology Bangalore, KARNATAKA

Bangalore, KARNATAKA

TECHNICAL SKILLS

Programming Languages — Python, Java, C#

Web Technologies — ASP.NET, HTML, CSS, JavaScript, REST APIs

Backend Frameworks — Flask, Django

Core Concepts — OOP, Data Structures, Algorithms, SDLC, Agile, Problem Solving

Databases — SQL, MySQL

AI & GenAI — OpenAI API, Gemini API, Prompt Engineering, RAG

Cloud & DevOps — AWS, Docker, Git, Linux

PROJECTS

Employee Task Management Web App

03/2026 – Present

ASP.NET MVC, C#, SQL Server, HTML, CSS, JavaScript

- Built a web application using ASP.NET MVC for managing employee tasks, with role-based access control for admins and users.
- Designed and implemented SQL Server database schema with CRUD operations via ADO.NET, following OOP design patterns.
- Integrated client-side validation using JavaScript and delivered a responsive UI using HTML and CSS, following agile development practices.

Intelligent Resume Optimization Platform

02/2026 – Present

Python, FastAPI, OpenAI, PostgreSQL, AWS

- Built a SaaS platform that analyzes resumes against job descriptions to improve ATS compatibility and candidate-job matching.
- Developed a hybrid ATS scoring engine using rule-based evaluation and embedding-based semantic similarity.
- Implemented resume parsing and skill gap detection pipeline and deployed the platform on AWS.

Mind Metric AI

06/2025 – 08/2025

Python, Flask, Machine Learning, Gemini API, HTML/CSS

- Built backend REST APIs supporting user authentication and data processing workflows using OOP principles.
- Integrated Gemini API for AI-driven psychological feedback generation using structured prompt pipelines.
- Implemented logging and error tracing systems for improved backend observability and software reliability.

COURSES

Certified on topic "Data Science with Python"

Simplilearn
