

Dev E2E User

Software Engineer

PROFESSIONAL SUMMARY

Experienced backend engineer with robust expertise in Python and cloud platforms. Proven ability to engineer scalable web APIs and manage database systems, aligning with requirements for a Senior Software Engineer.

WORK EXPERIENCE

Acme Corp — Backend Engineer (2021-Present)

- Engineered web APIs using Python and Flask to support scalable backend services.
- Managed and optimized PostgreSQL databases, ensuring data integrity and performance.
- Supported and maintained AWS cloud deployments, ensuring robust infrastructure operations.

PROJECTS

- Created internal automation tooling using Python to streamline operational workflows.
- Engineered data ingestion pipelines leveraging Python and PostgreSQL for efficient data processing.

EDUCATION

BS Computer Science, State University

TECHNICAL SKILLS

- Python - FastAPI - Docker - AWS - PostgreSQL - Flask
