EXPERIENCE

Associate Software Engineer 05/2026 Present

Nextgen Imprexis Devtech Solutions Pvt Ltd

Engaged in comprehensive training focused on Java Application Development, emphasizing robust OOP principles and enterprise software architecture.

Learning enterprise software development practices, application architecture, and client-driven development workflows for scalable solutions.

Participating in domain and project onboarding for business process automation and enterprise application development.

Intern Machine Learning 01/2025 04/2025

Ineuron Intelligence Pvt Ltd

Engineered a retail sales forecasting model, improving prediction accuracy and reducing RMSE by 18%.

Designed and implemented an end-to-end ML pipeline encompassing preprocessing, feature engineering, and model training.

Deployed a Streamlit inference application on AWS EC2, integrating structured logging for enhanced observability.

EDUCATION

B.E in Information Science and Engineering 08/2019 07/2023

CMR Institute of Technology Bangalore, KARNATAKA Bangalore,
KARNATAKA

TECHNICAL SKILLS

Cloud & DevOps AWS, Docker, Git, Linux Programming Languages Python, Java Backend Technologies Flask, Django, REST APIs Databases SQL, MySQL Core Concepts Data Structures, Algorithms, Object-Oriented Programming Data & ML Pandas, NumPy, Machine Learning AI & GenAI OpenAI API, Gemini API, Prompt Engineering, RAG

PROJECTS

Intelligent Resume Optimization Platform 02/2026 Present

Python, FastAPI, OpenAI, PostgreSQL, AWS

Architected and deployed a SaaS platform on AWS EC2 using Docker for analyzing resumes against job descriptions, enhancing ATS compatibility and candidate-job matching.

Developed a hybrid ATS scoring engine, leveraging rule-based evaluation and embedding-based semantic similarity for precise matching.

Implemented a robust resume parsing and skill gap detection pipeline, ensuring efficient and scalable processing.

House Price Prediction Service 12/2025 02/2026

Python, Flask, Scikit-learn, AWS

Built and deployed a Flask REST API on AWS EC2, serving machine learning predictions with enhanced stability.

Engineered separate training and inference pipelines to improve deployment stability and reliability.

Implemented health check endpoints, structured logging, and exception handling for improved service observability.

Mind Metric AI 06/2025 08/2025

Python, Flask, Machine Learning, Gemini API, HTML/CSS

Developed and deployed backend REST APIs on AWS EC2, supporting user authentication and data processing workflows.

Integrated Gemini API, implementing structured prompt pipelines for AI-driven psychological feedback generation.

Implemented logging and error tracing systems, enhancing backend observability for real-time usage.

COURSES

Certified on topic "Data Science with Python"

Simplilearn

PROFESSIONAL SUMMARY

Experienced Software Engineer with a strong foundation in designing, deploying, and maintaining scalable applications and machine learning services on AWS. Proficient in developing robust backend systems, automating deployment pipelines using Docker, and implementing monitoring and observability solutions, aligning with self-hosted infrastructure ownership and CI/CD automation principles.
